II. Available resources

1. Human resources

1. For the administration of the UNESCO Chair or Network
Partial time support Secretary
2. For the teaching/training/research activities
Please specify number of full professors, researchers, visiting professors, lecturers, others
Prof. Dr. O. Ferrer-Roca
Engineer, Fellowship Daniel González Mendez;
3. For the information and documentation activities:
Prof. Dr. O.Ferrer-Roca
4. For other activities: The international courses brought to teaching and training a total of 30 professors coming from European, African and Ibero-American countries (Greece, Germany, Spain, Uganda, Valencia, Argentina, UK).

2. Material resources

1. For the administrative work: Computers fax machines, xerocopy machines, printer, and storage systems.
2. For the teaching/training/research activities: Videoconference, workstations, ultrasounds, video-edition, projector, Book edition, CD-edition, Proceedings editions, e-learning, Digital Fingerprint control systems, Breeze server, iPhone medical applications.
3. For the information and documentation activities: Web site, Posters, brochures, Proceedings, Book editions, CD-edition
4. For other activities (Please specify): Videoconferencing, 3D-virtual reality, skylight distant control, iphone applications (blood pressure monitor, ECG, EEG), Galaxy camera over android OS, Cloud systems.

III. Activities

Please, provide information on items 1 to 7 for each activity, when available, and specify:

- *Target groups, in accordance with Annex 1*
- *Geographical coverage, in accordance with Annex 2*
- *Funding sources, in accordance with Annex 3.*

1. Education/Training/Research

1.1. Title and expected results for each course, workshop,...

See joined memorandum and programs of the Winter Courses of the CATAI (Annex 5-Form 3)

- Duration: 1weeks.
 - Target groups: doctors, nurses, health-care providers, NGO's
- 1.1.1. Partnership (*please specify the name of the Institution, city, country*):
Universities Trier-DE, Postdamm-DE, Humboldt Univ. Berlin-DE, Makerere-Uganda, Simon Bolivar-Caracas-Venezuela, Athens Univ. of Economics and Business-GR, Istanbul-Turkey, El Cairo- Egypt, EntreRios-Argentina, Barcelo Univ Buenos Aires, Argentina, Pontificia Universidade Catolica do Rio Grande do Sul (PUCRS) Porto Alegre-Brazil, Porto-Portugal, Univ Oslo, Oslo-Norway, Univ Munich-Munich-Germany, Universidad Politecnica Barcelona (UPB)- Spain. Hosp. Clinic Barcelona-Spain, Univ. Di Roma Sapienza-Italy, Univ Budapest-Hungary, Univ Udine, Italy. Univ. Cheikh Anta Diop, Dakar, Senegal, Univ d'Abomey Calavi (Cotonou), Rép. Du Benin y Univ Nacional de Guinea Ecuatorial (UNGE), Guinea Ecuatorial, University California (UCLA)-USA, Univ Valencia,(UV). U.Baleares (UB), Shahid Beheshti Medical University, Tehran, (Iran), U Caribe-Barranquilla, (Colombia), Vitanlink (France), L'Institute Mines Telecomm (France), Science Park (Bulgaria), Municipalities of Piamonte, Univ. Beijeen (China), Univ. Torino (Italy), Barcelona Supercomputer Centre (Spain), Univesity libre de Bruseles (Belgium), Kazakistan (), , .
- Geographical coverage partners & participant: Europe-Africa-South & North America.
 - Funding sources: CATAI founding. Telefónica SL. CajaSiete SA.
 - Outputs: Please specify number of doctoral students: 150-200 students per year. For the publications, complete form of Annex 4, and Annex 5 for the multimedia material.

2. Conferences/Congresses/Meetings

2.1. Title and expected results for each conference, meeting....:

They are always in Telemedicine. Expected increase of knowledge and training of how to handle medicine at distance for people and areas underserved or with health care constrains availability.

Dates and place: In 4-10th March 2013 the XXI CATAI Winter Course in System on Chip (SoC) devices in telemedicine from LABoC to high resolution images. January 2015. Humanization of Healthcare (H2O) and we attended the following congresses and meetings: In the 25th January 2013 the international meeting of the IWEE (Foro Internacional de e-Health in Emerging Economies) under Social Justice with the participation of the WHO, EC, WB, Red Cross, Doctors without frontiers. In the 22nd – 23th January 2014 Meeting of UNESCO Chairs on Higher Education, Teachers, and ICT in Education in the UNESCO Paris. In the 29th -30th May 2014 the international meeting of the IWEE (Foro Internacional de e-Health in Emerging Economies) under Social Justice with the participation of the WHO, EC, WB, Red Cross, Doctors without frontiers. 28September-2 August 2014 Meeting at the Politechnic University of Catalonia to continue with the Solo-medicine project. 13-15 August 2014 meeting with St.Lazare hospital director to introduce Humanization of Healthcare. In

the 17th-18th October 2014, Beijin-China in the International Conference on Identification, Information & Knowledge in the Internet of the things (IoT); In October 2014, meeting at the Institute Mine Telecomm for the elaboration of the Humanization of Healthcare.

- Partnership (please specify: Name of the Institution, City, Country): see joined programs plus Mulago Hospital-Uganda; Roche Research Center, Univ Perm-Russia, Casablanca-Marocco, Pontificia Universidade Catolica do Rio Grande do Sul (PUCRS) Porto-Alegre-Brazil. Technical University Munich (Germany). Israel Institute of Technology (Haifa-Israel), U Caribe-Barranquilla, (Colombia).
- Participants (number): 100 up to 1000 depending of the type of meeting
- Geographical coverage for participants and partners: Europe, Africa, South-America, Asia & Australia.
- Funding sources: CATAI funding. Telefonica SL. CajaSiete.
- Outputs: Please complete Annex 1 for the publications and Annex 2 for the multimedia material.
- Master at distance on "**Health Legal Aspects**". With the topic of Telemedicine. University of Balear Islands. <http://catai.net/blog/2012/07/master-de-derecho-sanitario/>. Editions 2013-14 and 2014-15.

3. Missions / Travels abroad

Destination: University La Laguna-UNESCO Chair Telemedicine.

From : Venezuela- UK- Argentina

Purpose: Students training in telemedicine

Duration: from 1 to 2 month

Funding source: University of La Laguna/CajaSiete/ Catai fundings/

Outputs: 1- Training of students to provide telemedicine in underserved areas.

4. Visiting professors / Fellowships

Number: (17)

Duration: 1-2 month

University of origin: Potsdam-Germany (2), Clinical university of the Charité-Berlin (2), Univ Athens (3), Univ Munich- Germany (2), Univ Mainz, Germany (1) Univ Budapest, Hungria (2), U. Politecnica Barcelona (2).U.Valencia, Spain (1), U.California, USA (1),

Funding sources: University of La Laguna, CATAI fundings, Telefonica SL, CajaSiete.

5. Information and documentation activities

- 5.1. **CATAI 2013** "System on Chip (SoC) devices in telemedicine from LABoC to high resolution images" CATAI editions 2012 Tenerife. Canary Islands. Spain ISBN: 978-84-615-6080-6
- 5.2. **CATAI 2009** "Superresolution and Optical Biopsy" Ed: Prof.Dr.O.Ferrer-Roca. CATAI Ed 2008. Tenerife. ISBN. 978-84-612-8620-1
- 5.3. European Master of Telemedicine and Bioengineering applied to Telemedicine, **Volume V**. CATAI Editions 08. ISBN 978-84-612-8290-6
- 5.4. European Master of Telemedicine and Bioengineering applied to Telemedicine, **Volume VI**. CATAI Editions 09. ISBN 978-84-613-7245-4.
- 5.5. European Master of Telemedicine and Bioengineering applied to Telemedicine, **Volume VII**. CATAI Editions 10. ISBN 978-84-614-5996-4.
- 5.6. European Master of Telemedicine and Bioengineering applied to Telemedicine, **Volume VIII**. CATAI Editions 11. ISBN 978-84-615-6144-5.
- 5.7. European Master of Telemedicine and Bioengineering applied to Telemedicine, **Volume IX**. CATAI Editions 12. ISBN 978-84-615-6081-3

5.8. European Master of Telemedicine and Bioengineering applied to Telemedicine,
Volume X. CATAI Editions 13. ISBN 978-84-616-2364-8

6. Others

6.1. Written agreements with Universities

- 6.1.1. Agreements with the University of Barcelona in order to provide distant teaching and projects related to the image query standardization
- 6.1.2. Agreements with the Pontificia Universidade Catolica do Rio Grande do Sul (PUCRS), Porto-Alegre, Brazil for training in telemedicine.
- 6.1.3. Agreements of the students interchange in the field of Telemedicine and for third cycle students with the Universities of Postdamm-DE (6 Students), Charite-Berlin-DE (6 Students) and Univ. Udine-IT (6-students) as Erasmus students, plus 1 or 2 professors from each University.
- 6.1.4. Agreements with the CLARA NETWORK (e-LAB) in the Univ Autonoma del Caribe-Barranquilla. Colombia. An on line laboratory network on medicine. 2011.
- 6.1.5. Agreements with the Shahid Beheshti Medical University, Tehran, Iran.2012
- 6.1.6. Agreement with the University of Tuckmenistan.2012
- 6.1.7. Agreements with the Siksha O Anusandhan University (India) 2013.

6.2. Training Books donations

- 6.2.1. Donations of the vol. V of the European Master of Telemedicine and Bioengineering applied to Telemedicine. to the Universities of Entre-Rios (5), Makerere (6), Caracas (5), Greece (5), Univ. Rio Grande do Sur.Brazil (6).
- 6.2.2. Donations of the vol. VI of the European Master of Telemedicine and Bioengineering applied to Telemedicine. to the Universities of Entre-Rios (5), Makerere (6), Caracas (5), Greece (5), Univ. Rio Grande do Sur.Brazil (6), Senegal (3), Rép. Du Benin (6) y Guinea Ecuatorial (4).
- 6.2.3. Donations of the vol. VII of the European Master of Telemedicine and Bioengineering applied to Telemedicine. to the Universities of Entre-Rios (5), Makerere (6), Greece (5), Univ. Rio Grande do Sur.Brazil (6).
- 6.2.4. Donations of the vol. VIII of the European Master of Telemedicine and Bioengineering applied to Telemedicine. to the Greece (5), Univ. Rio Grande do Sur.Brazil (6), Univ Tuckmenistan (12), U.Caribe-Barranquilla (6) .
- 6.2.5. Donations of the vol. IX of the European Master of Telemedicine and Bioengineering applied to Telemedicine. to the Greece (5), Univ Tuckmenistan (12), U.Caribe-Barranquilla (6), Shahid Beheshti Medical University, Tehran, Iran (6) .
- 6.2.6. Donations of the vol. X of the European Master of Telemedicine and Bioengineering applied to Telemedicine. to the Greece (5), Univ Tuckmenistan (12), Shahid Beheshti Medical University, Tehran, Iran (6) .

6.3. International projects

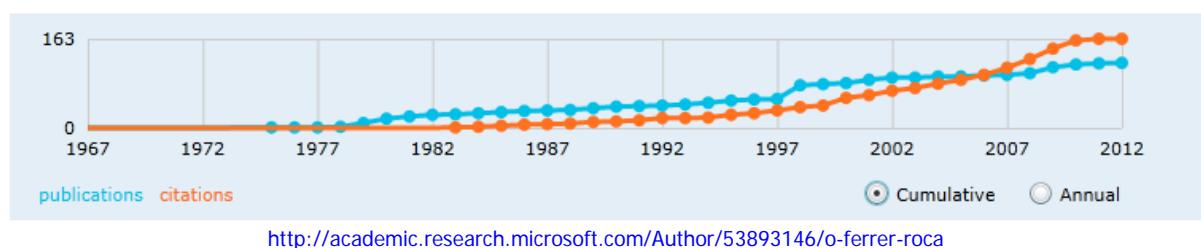

- 6.3.1. Tempus Project : 530574-TEMPUS-1-2012-1-ESTEMPUS-JPCR. *Advanced Curriculum development in Telemedicine for Turkmenistan (MEDET)*.
- 6.3.2. H2O- Humanization of Healthcare. In preparation.
- 6.3.3. Humanization of Healthcare-Trials in Piamonte & Servia. Interreg-Med 2015.

IV. Impact

1. In Uganda, their initiatives with the use of VHF in walky-talkies to support midwives, has decreased the mortality of new-born babies by 30%.
<http://www.iicd.org/articles/iicdnews.2006-05-08.0697050392>
2. With the Simon Bolivar University in Caracas Venezuela, we will bring the development of rural areas accessing distant diagnosis of vaginal cytology.
3. With Pontifícia Universidade Católica do Rio Grande do Sul (PUCRS) PortoAlegre in Brazil has been started obtaining funding for a joint seminar of training and extending the telepathology to telepathology and teledermatology mission to the Amazon (City of Jiparana) and in Amazon area (Rondonia State).
4. With Entre-Ríos cooperation have extended the telemedicine into the Peru selvage areas in the Napo river.
5. Scholarships of the GD of the relations with Africa from the Canarian Government.
6. Cooperation with the Institute of Tropical diseases in providing DIY (Do it yourself) support for tropical disease diagnosis.
- 7.

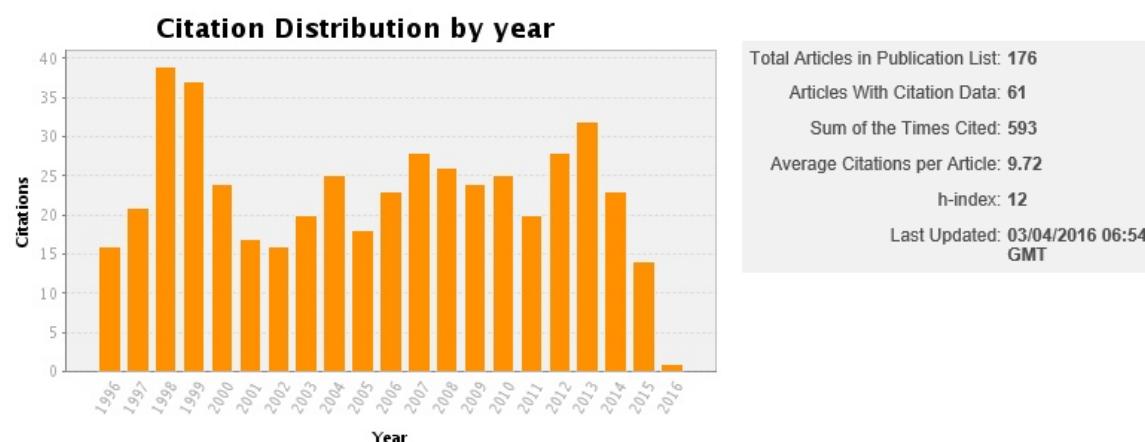

One of the **main obstacles** in the wide use of Telemedicine is the lack of specific training and qualifications in the health care environment (doctors, nurses, paramedics, managers, NGO's) as well as related areas from which they require support (computer science, telecommunications).

1. Relation Article Citation in international collaborations

My Publications: Citation Metrics

This graph shows the number of times the articles on the publication list have been cited in each of the last 20 years.
Note: Only articles from Web of Science Core Collection with citation data are included in the calculations. [More information about these data.](#)

Form 1: Publications

- 1. Title of activity: STANDARDS IN TELEMEDICINE.**
- 1. Title. System on Chip (SoC) devices in Telemedicine from Lab on Chip (LoC) to high resolution images.**

Publisher(s): CATAI editions 2012 Tenerife. Canary Islands. Spain ISBN: 978-84-615-6080-6
Year: 2013
Number of pages: 78

Type of document/material:

- Book X
- Periodical
- Others (*specify, please*)

Teaching/learning material

Language(s): >Bilingual (English/Spanish)

Main keywords (4 or 5):

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

La capacidad de miniaturización en micro o nano MEMs permite en la actualidad una gran calidad de imagen y procesado en aparatos portables, particularmente en teléfonos móviles inteligentes que mantienen el procesado local o en la nube. Igualmente el procesado de las imágenes digitales permiten en la actualidad técnicas de superresolución, enfoque en todos los planos e identificación holográfica que aseguran capacidades diagnósticas y de detección nunca antes imaginadas.

A eso se une la exigencia del WEF (world económica fórum) sobre la sanidad a la que le demandan 3 actualizaciones esenciales su inmersión total digital, su innovación en la provisión de servicio y la prevención creando ciudades sanas. En cualquiera de ellas se requerirá un entorno BYOD (bring your own device) y la utilización de las modernas técnicas de gamificación para mantener la productividad y la motivación de los trabajadores sanitarios.

Las ventajas y los inconvenientes que todas ellas aportan a la sanidad serán analizadas con la presentación de los expertos mundiales de las materias. Son retos que en muchos casos requieren renovación o innovación inversa pero con las técnicas de QoS (Quality of Service) que demandan nuestros países tanto en USA como en la UE.

- 2. Title: The Anatomy of an Optical Biopsy Semantic Retrieval System.**

Publisher(s): Revista IEEE Multimedia.
Producer and/or distributor (*with address*): vol 19 (n2)
Year: 2012

Number of pages: 12 (pp.16-27)

Type of document/material:

- Book
- Periodical
- Others (*specify, please*)

Teaching/learning material

Language(s): English.

Main keywords (4 or 5): Multimedia, metadata, multimedia databases, standards, image retrieval, video retrieval, feature measurement, healthcare

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

This paper addresses the question of how to build a case-based computer-aided diagnosis system that assists physicians and other medical personnel in the interpretation of optical biopsies obtained through confocal laser endomicroscopy (CLE). An optical biopsy is an optic diagnostic method capable to analyze the tissue in surface and in depth without the need to extract it from the body. The system allows users to navigate and search over an image database containing optical biopsies of the human colon recorded with CLE. Users are able to retrieve information about precedent diagnostics by providing an example CLE image for content based image retrieval (CBIR), by using keywords for structured retrieval. The system's CBIR approaches a novel algorithm for automatic feature extraction in CLE images, showing results on inferring semantic metadata from low-level features. In order to ensure the interoperability with potential third-party applications, the system provides an interface compliant with the recent standards ISO/IEC 15938-12:2008 (MPEG Query Format) and ISO/IEC 24800 (JPEG Search).

3. Title: Health 4.0 in the i2i era

Publisher(s): International Journal of Reliable and Quality E-Healthcare (2011)

Producer and/or distributor (with address):

Year: 2012

Number of pages: 15 (pp. 43 - 57)

Type of document/material:

- Book X
- Periodical
- Others (specify, please)

Teaching/learning material

Language(s): English & Spanish.

Main keywords (4 or 5): iPhone, mHealth, Medical device, standards, quality

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

The acceptance of iPhones, iPads, and iPods in medical environments, as well as the FDA approval of several diagnostic-prognostic-distant care-management applications, demonstrates the modern medicine trend to introduce mobile applications initiating the i2i era. Furthermore, Cloud and Internet applications ranging from non-quality control up to intelligent-quality-control data base management anytime, anywhere, are the basis of what is called Health 4.0. The present editorial listed approved FDA applications and future deployments, including three personal projects in iHealth: blood-pressure monitoring, iAnapath and the i-EEG control in child Attention Deficit Disorder.

4. Title: Health care management innovation in the net. Cloud- SoC- LaboC and high resolution image techniques change the way to practice medicine.

Publisher(s): CATAL Editions 2012.

Producer and/or distributor (with address):

Year: 2012

Number of pages: 15-17, 64-69 (9 pages)

Type of document/material:

- Book X
- Periodical
- Others (specify, please)

Teaching/learning material

Language(s): English & Spanish.

Main keywords (4 or 5):

Multimedia, metadata, multimedia databases, standards, image retrieval, video retrieval, feature measurement, healthcare

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

We cover every year the innovations in Telemedicine. This year are focused on management, specifically on BYOD or bring your own device and on gamification. From the technical point of view, TM devices expect dramatic innovation with the SoC (system on chip) and the new HD image techniques. TM devices are now miniaturized and capable to be included in smart phones.

5. Title: Big Data versus Small Data.

Publisher(s):IEEE.

Producer and/or distributor (with address):

Year: 2014

Number of pages: (2 pages)

Type of document/material:

- Book
- Periodical X
- Others (specify, please)

Teaching/learning material

Language(s): English.

Main keywords (4 or 5):

Cloud, Fog, Bigdata, Smalldata, Health 4.0, mHealth, Intelliagents, agents, PHA, Personal health assistants.

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

Facing user experience in Health care data coming from Health 4.0 in the IoE (internet of everything) two serious distinctions appear. Not all data processed in "The Cloud" is Big Data, on the contrary there is a relevant proportion of Small Data that should be processed in "The Fog".

In this statement there are several new references that should be understood. To whom it belongs, what to do with it and how to do it are the main differences.

Characteristics

	BIG DATA	SMALL DATA
<i>Belongs to</i>	<i>Governement/State</i>	<i>Individuals/Patient</i>
<i>Anonimized</i>	<i>YES</i>	<i>NO</i>
<i>Encrypted</i>	<i>NO</i>	<i>YES</i>
<i>Processed in</i>	<i>The Cloud</i>	<i>The Fog</i>
<i>Response</i>	<i>Months / Years</i>	<i>Minutes / On time</i>
<i>Obtained from</i>	<i>Institutions/EHRs</i>	<i>Sensors / At home / PHR</i>
<i>Procesed by</i>	<i>Data Base tools</i>	<i>e-Agents</i>
<i>Stored</i>	<i>By Govern/Distributed</i>	<i>By Individuals/ Personal Assistants</i>
<i>Useful</i>	<i>for Decision makers</i>	<i>for Individuals</i>

It is clear therefore that in the cloud or in the fog both type of data cannot be mixed or processed together.

Outputs-II**Form 2: Multimedia material****Title of activity: TELEMEDICINE-CD****1. Title: CATAI Telemedicine-CD. ISBN 84-923357-2-6**Producer and/or distributor (*with address*): CATAI

Language(s): English- Italian-Spanish

Main keywords (4 or 5): Telemedicine

SHORT ABSTRACT

According to one of the numerous definitions of Telemedicine “providing medicine at a distance”, any doctor being trained in the use of some telematic devices could effort what he practice. The reality is far from this because to assure a safe practice, people have to learn and bear a minimum understanding of a wide range of topics: from economics to telecommunications and from medicine to legal aspects. Technology learning is not limited to technology itself but linked to its social practical consequences in all their aspects. To guarantee that none of the aspects related with Telemedicine are missed, this minimum knowledge has to be fixed, organized and in some way standardized. The main purpose of this book is to structure the basic knowledge linked to teaching to provide or to practice telemedicine, as well as an overview of the technology developments linked to this new discipline. As expressed in the title (Handbook of Telemedicine), the book is precisely structured as a “handbook” whose main value is the joint opinion of all the participating authors of what are the learning requirements for anyone that would like to practice Telemedicine. It is neither a full treatise nor a complete collection of all telemedicine applications or telemedicine basics. It was built with the aim of creating awareness to the academic aspects (technology development, telecommunications approach, law and regulations, medical practice) as well as to the minimum knowledge requirements to guarantee safe and appropriate medical practice. Nowadays this fact is enhanced by the evidence that welfare expenses cannot be endlessly increased, whilst an efficient health provision system in the context of the information society, will mark a new trend to configure health care practice in the next century. If training and teaching schemes are to cope with the demands of society it seems obvious that those careers and professions should consider structured and sufficient training in Telemedicine.

2. Title: EU-Master of Telemedicine and Bioengineering applied to TelemedicineProducer and/or distributor (*with address*): CATAI Ed. ISBN 84-609-2162-X

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

Los avances tecnológicos en el campo de la visión microscópica de las imágenes o la capacidad diagnóstica de una gran variedad de técnicas ópticas, obligan a analizar y reubicar el papel del Anatomopatólogo en la medicina. Ni los microscopios, ni la tinción, ni el procesado de tejidos son hoy en día imprescindibles para diagnosticar una lesión. Se hace necesario contar con publicaciones morfológicas que determinan el estándar de acuerdo con la técnica empleada de estas biopsias *in vivo* o biopsias ópticas no disruptivas.

(Brief description of the content in English, French or Spanish)

IoT. El Internet de los Dispositivos médicos. Salud 2.0 a Salud 3.0, trata de los aspectos tecnológicamente mas avanzados sobre la gestión de los dispositivos a distancia a través de Intra o Internet, con identificación univocas y altas en la red, que permiten la ubicación, gestión y modificación a distancia de los dispositivos médicos o mecánicos asociados (ejem: camillas...) de forma que se facilite no solo un MRP (management resource planning) sino una telemetría en condiciones de permitir la monitorización de los pacientes. En el segundo apartado nos movemos desde la Salud electrónica 2.0 a través de Internet en la que la calidad y control es limitado a la Salud 3.0 en la que se priman los criterios de control de calidad en todos los ámbitos de automatización y robotización. Para ello contamos con expertos internacionales, especialmente seleccionados por sus aspectos innovadores en su clínica diaria o en sus investigaciones y por su apuesta por la estandarización y calidad de la asistencia.

SHORT ABSTRACT

(*Brief description of the content in English, French or Spanish*)

Móviles 4G en Telemedicina, trata de los aspectos tecnológicamente más avanzados sobre la gestión de los dispositivos a distancia a través de Telefonía móvil. Particularmente:

1.- El uso de los móviles de última generación para la medicina y las aplicacionesH2H (health2health) y las Smart-GRID o el acceso universal en la Nube, además de los aspectos técnicos del Packet Backhaul Technology, o las estrategias packet-core.

2.- El control de calidad de las aplicaciones de Telemedicina

3.-El informe:"Telecommunications, IT and Healthcare: Wireless Networks, Digital Healthcare and the Transformation of US Healthcare, 2006-2011" en el que se especifica que en USA la industria de TIC relacionadas con la salud se incrementara en un 8.4% en 5 años cubriendo desde \$7.5 billones en 2008 a \$11.3 billones en 2013. El gasto sanitario pasara de ser un 6% del PIB a un 16% a un 18%. La industria sanitaria se ve forzada a operar de forma más eficiente, y un elemento central será la creación de redes eficientes capaces de compartir no solo datos sino imágenes de calidad para el diagnóstico remoto que se lleva a cabo con personal

Medico altamente cualificado. Un coste enorme se pierde en el sistema en la interfaz médico-paciente – tiempo de desplazamientos, buscar plazas a los enfermos, buscar la atención que requieren, administrar la atención etc... - Por ello el control remoto es algo esencial.

Para ello contamos con expertos internacionales, especialmente seleccionados por sus aspectos innovadores en su clínica diaria o en sus investigaciones y por su apuesta por la estandarización y calidad de la asistencia.

SHORT ABSTRACT

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

Sanidad en la nube, i-Cloud y Consulta masiva trata los aspectos relacionados con “ la nube sanitaria”, el papel que la telefonía móvil desempeña en este tipo de actividades, así como la repercusión que tiene el denominado “ Crowsourcing” en el contexto sanitario que permite a los médicos consultar con los mayores expertos en las distintas áreas sanitarias.

La tecnología debe asegurar un sistema de provisión de servicios en sanidad, viable económicamente, descentralizado y ubicuo todo ello a bajo coste por ello los teléfonos inteligentes y los servicios en la Nube van a ser determinantes en esta evolución. El almacenamiento masivo de datos y su accesibilidad y control remoto con virtualización disminuirán costes y personal. se tratan en el presente libro, que se basara principalmente en cómo pueden los profesionales médicos valerse de las nuevas tecnologías y la comunicación (TICS), para hacer más eficiente las asistencia a distancia.

Para ello contamos con expertos internacionales, especialmente seleccionados por sus aspectos innovadores en su clínica diaria o en sus investigaciones y por su apuesta por la estandarización y calidad de la asistencia.

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

The CATAI web has as a main objective the spread of the Telemedicine in Spain and in developing countries. The non-for profit association for the CATAI (Center of Advanced Technology in Image Analysis) supports Telemedicine activities and studies in the field of:

Image Analysis at distance

Data transmission

Videoconsultation and videoconferences

On Line training

Distant telequantitation.

The Winter Courses of the CATAI can also be followed on line in a video streaming during its production by means of the Helix Videoserver providing Real Media output that contains the Power Point presentation together with the video image of the speaker.

Information material X

Type of material:

- Video
- CD ROM
- Videoconference:
- Other type of material X
- (Please specify): Discussion Groups

Duration: Everyday participations.

Language(s): English- Spanish

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

The Unesco Telemedicine Linkedin profile works as a nexus with other people and organizations. Participations in discussion groups as “Horizont 2020 Framework”.

8. Title: Slideshare profile: http://www.slideshare.net/OFRoca/edit_my_uploads?page=1

Producer and/or distributor (with address): CATAI

Year: 2013-2015

Teaching/learning material

Information material X

Type of material:

- Video
- CD ROM
- Videoconference:
- Other type of material X
- (Please specify): Discussion Groups

Duration: 13 uploads. 180 followers .

Language(s): English- Spanish

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

The Unesco Telemedicine slide-share profile is very much appreciated since it post outstanding material related with innovation and humanistic prospective of the Healthcare.

9. Title: Scoop-it profile: <http://www.scoop.it/u/unesco-telemedicine/curated-scoops>

Producer and/or distributor (*with address*): CATAI

Year: 2014-2015

Teaching/learning material

Information material X

Type of material:

- Video
- CD ROM
- Videoconference:
- Other type of material X
- (*Please specify*): Discussion Groups

Duration: 1100 views- 60 uploads. 29 followers .

Language(s): English- Spanish

SHORT ABSTRACT

(*Brief description of the content in English, French or Spanish*)

The Unesco Telemedicine Health 4.0 scoop-it section of curated information regarding Health 4.0 is a classical one since it updated all information regarding Humanization of Healthcare, DIY, mHealth, Equity in Healthcare.

10. Title: Diabetes control <http://193.145.112.231/CHS/>

Producer and/or distributor (*with address*): CATAI

Year: 2002-2011

Teaching/learning material

Type of material:

- Video
- CD ROM
- Videoconference:
- Other type of material X
- (*Please specify*): Support of diabetic people at distance

Duration:

Format: Html;

Language(s): English- Spanish

Main keywords (4 or 5): Telemedicine, Diabetes, SMS

SHORT ABSTRACT

(*Brief description of the content in English, French or Spanish*)

Web Server is available for medical people groups in English and in Spanish that is able to test Diabetes control at distance. It is accessible by the Internet and also using mobile phone SMS.

11. Title: Anticoagulant treatment control at distance <http://193.145.112.231/INR/>

Producer and/or distributor (*with address*): CATAI

Year: 2002-2011

Teaching/learning material

Type of material:

- Video
- CD ROM
- Videoconference:
- Other type of material X
- (*Please specify*): Support of people treated with an anticoagulant treatment.

Duration:

Format: Html;

Language(s): English- Spanish

Main keywords (4 or 5): Telemedicine, INR, telemetry, anticoagulation, SMS

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

This web site is available for any patient or doctor who either can be controlled at distance or want to control the patient at distance. It includes a Decision Support System (DSS) to advise the user on the type of treatment that should be implemented plus the capability of give messages from the doctor to the patients and vice versa.

Title of activity: DISTANT TEACHING

1. Title: <http://alexandros.ccslab.aueb.gr/~ctc>

- Video
- CD ROM
- Videoconference:
- Other type of material X
- (Please specify): Web page

Duration:

Format: Html

Language(s): English-Spanish

Main keywords (4 or 5): Telemedicine distance training

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

The present activity carries out the diffusion of the structured training skills in the field of TELEMEDICINE. It introduces an innovative professional training by assuming new Information Society skills not only in the Health Care provision but also in the teaching methodology. The co-operation inside of the present CTC consortium will provide and update the contents of those rapidly moving technologies, and will bring innovative approaches in the teaching done at distance with experience of the ODL of APOLLO project as well as the experience on surgical virtual reality simulators provided by the new partners. The training is directed towards trainers to update their knowledge and skills; therefore, it means health care professionals (including directors and responsible people) in the European Union. This requires the updating of the Information Society training applied to health care.

This activity is linked with the initiative of the UNESCO Chair of Telemedicine to apply the consortium experience towards the urgent demand of Telemedicine in developing countries to improve their limited health care system efficiency and accessibility. The International teaching activities are arranged in intensive winter and Summer Courses particularly to update trainer knowledge and teaching material. This activity also takes into consideration the fact that a complete training is not possible in each individual country due to the irregular Health Care technology developments throughout the European Union

2. Title: Distant coaching and training(BREEZE) <http://www.cataibreeze.ull.es/>

Producer and/or distributor (with address): CATAI

Year: 2006-2015

Teaching/learning material X

Type of material:

SHORT ABSTRACT

(Brief description of the content in English, French or Spanish)

La cátedra de Anatomía Patológica de la Universidad de La Laguna, ostentada por la doctora Olga Ferrer-Roca, ha organizado el XXV Curso de Análisis de Imagen del CATAI (Curso Avanzado Tecnológico de Análisis de la Imagen). Con este programa se pretende acercar a alumnos y profesionales del sector los avances en telemedicina, es decir, la prestación de servicios médicos a

distancia utilizando las nuevas tecnologías. El curso se impartirá entre el lunes 12 y el domingo 18 de marzo y tiene una duración de 80 horas.

Form 3: Program of Courses

2013 - Title of activity: SYSTEM ON CHIP (SoC) devices in Telemedicine. From Lab on Chip (LoC) to high resolution images

XXI WINTER COURSE OF CATAI

XXVI IMAGE ANALYSIS COURSE OF THE ULL

04th March-10th March 2013

SYSTEM ON CHIP (SOC) DEVICES IN TELEMEDICINE FROM LABOC TO HIGH RESOLUTION IMAGES

La Laguna. Tenerife. Canary Islands. Spain.

Course recognized by: ESCAP (European Society of Analytical Cellular Pathology),

ISDQP (International Society of Diagnostic Quantitative Pathology) and ISCO

(International Society of Cellular Oncology). <http://www.qub.ac.uk/isco/iscoweb/>;

by EFMI (European Federation of Medical Informatics) <http://www.efmi.org/>

80 Teaching hours

MONDAY 4TH MARCH, 2013

16-20h • Welcome to the Course. **F. Luengo Orol**, Chancellor of Industrial Development and Technological Innovation. **Prof. Dr. E. Domenech**, Head of the University of La Laguna (ULL), Tenerife. **Prof. Dr. C. Ruiz-Pérez**, Research Vice-Chancellor, Univ. of La Laguna, Tenerife. *NIR-tomography & fMRI applied to Neurology* **Prof. Dr. JL Gonzalez Mora**, Physiology. ULL. <http://www.nirx.net/breast-imaging>.

TUESDAY 5TH MARCH, 2013

16-20h • Photonics based Telemedicine Technologies **Prof. Dr. A.Ozcan**, Univ.California UCLA. Innovation through photonics. <http://www.innovate.ee.ucla.edu/>; <http://biogames.ee.ucla.edu/>; <http://www.ee.ucla.edu/faculty-ozcan.htm>; BYOD (*Bring Your Own Device*), gamification and high resolution in Telemedicine, **Prof. Dr. O. Ferrer-Roca**, UNESCO Chair of Telemedicine, Univ. La Laguna ULL. <http://www.teide.net/catai>. Superresolution in digital holographic microscopy by synthetic aperture. **Prof. Dr. V. Micó**. Physics Faculty. U.Valencia. <http://www.uv.es/gpoei/eng/directorio.html>

WEDNESDAY 6TH MARCH, 2013

16-20h • Vidyo, High definition videoconference without MCU. **Frank Ruge** VP Vertical Market EMEA, Vidyo. <http://www.vidyo.com>. In-Memory Technology – An Enabler for Personalized Medicine, **Prof. Dr. Ch. Meinel**, Hasso-Plattner Institute, Potsdam University, Germany, <http://www.hpi.uni-potsdam.de/>

THURSDAY 7TH MARCH, 2013

16-20h • Project 2020.Future Medical Office. **Prof. Dr. G. Graschew and V. Guerkan**, Clinical University of the Charité, Berlín, <http://www.rk-berlin.de/op2000>. ESA- European Space Agency, ESTEC-European Space Research and Technology Centre, Noordwijk, Holanda, <http://www.esa.int>. Open source EHR and image processing. **Ing. L. Falcon**. <http://health.gnu.org/>

FRIDAY 8TH MARCH, 2013

16-20h • New type of images in medicine. **Prof. Dr. A. Horsch**, Technical Univ. Munich. Germany. <http://www.efmi-wg-mip.net/>. Lab on chip analysis systems for viruses **Ing. Dr. Reiner Gotzens**. MicroTEC. Germany. http://www.microtec-d.com/html/d_company/e_fuehrung.html

SATURDAY 9TH MARCH, 2013

16-20h • Assistant living with images. **Ing. D. Gonzalez**, Unesco Telemedicine, Canary Islands. <http://catai.net/blog/acerca-de-este-blog/>. Images role in e-health. **Prof. Dr. A. Kastania**, Athens University of Economics and Business, Greece. <http://www.aueb.gr/users/kastania/researchank.html>.

SUNDAY 10TH MARCH, 2013

16-20h • Students presentation of the IT works. Coordinator: **Prof. Dr. O. Ferrer-Roca**, Telemetry, Mr. **J. L. López**, COMITAS Communications. <http://www.comitas.es>. Wheels for iPad to build a COW (computer on wheels), Double-robotics, <http://www.doublerobotics.com/#>.

WORKSHOPS: Everyday from 8 to 16 h.

Near Infrared images (NIR) and fMRI-functional MRI (*Prof. Dr. J. L. Gonzalez-Mora, F. Rodríguez Hernández, Dr. G. Navarrete García, C. Modroño Pascual*); 2. Robotic surgery and intelligent operating room (*Prof. Dr. A. Alarcó & Dr. A. Bravo*); 3. Double Robotics COW with iPad; 4. Full HD telemedicine with Vidyo (*Ing. J. González*); 5. BYOD & Galaxy camera. 6. iPhone telepathology with SkyLight. 7. Dropbox cloud.
